

It is a well known fact that the finest Oranges and Grape- fruit produced in the world are grown in Florida :: :: ::

It is equally true, but not so well known outside of Florida, that the finest flavored and most delicious of the citrus products of that State are raised in the Orange County Highlands, of which district WINTER PARK is the center.

Nowhere else do the citrus fruits reach the excellence of flavor, aroma, juiciness and texture as here.

The Winter Park Citrus Growers' Association, of the Florida Citrus Exchange, have the finest, newest, and best equipped packing house in the world. All the fruit handled by this Association is literally "handled with gloves," no bare human hand ever coming in contact with the fruit from the time it ripens on the tree till it is unpacked by the purchaser, hence the Slogan of the Association, "Touched by no hand but yours," so extensively used in advertising the product of this house.

This Association also insists that no fruit shall be handled through its house till it is *ripe*. When you buy an orange of any one of the three brands of the Winter Park Association ("Angel," "Bulldog," or "Camel" brands) it is a guarantee of ripe, clean, perfect fruit, of flavor and quality unequalled.

When you visit WINTER PARK, a visit to the packing house of the Association will prove very interesting, entertaining, and instructive, and visitors are always welcome.
